- Unicode

Why?

Multiline Strings

Remember this?

```
let myString = "If i want to show newlines \nI need to do it like \nthis or even with \ttabs"  
// If i want to show newlines  
// I need to do it like  
// this or even with  
//      tabs
```

Never again.

Multiline Strings

The future is here!
(demo)

Collections

Remember this?

```
let stringCount = "Awesomeness".characters.count  
// 11
```

Never again.

Collections

The future is here!
(demo)

Substrings
